General Purpose Workwear Workshirt & EN531

Specification Sheet: Workshirt Spec (144.2 kB) ([Download](#))

Fabric Specification Sheet: Workshirt Fabric spec (27.5 kB) ([Download](#))

Manufactured in polyester cotton, this workshirt is light, functional and designed for serviceability - particularly suited where the garment needs to be cleaned in an Industrial wash process. Unlike a lot of shirts, the interlinings in the collar and cuffs have been tested to cope with temperatures up to 70°C without showing effects of 'bubbling' of the interlining. This feature adds considerable to the life and appearance of the garment. Food Hygiene Garments should be Thermally Disinfected during the industrial laundering process
